## DEATH OF GEORGE WREN. He Acted With Wilkes Booth at One

New York, May 14.-George Wren, of Brooklyn, died yesterday at the home of his brother at Lancaster, near Buffalo, N. Y. He was born in London, England, in 1837, and was a member of the Wren fam ily, which during several generations had given actors to the stage of England and America.

when he was ten years old and settled in Buffalo. He became a guide at Niagara Falls, and while escorting tourists under the falls he would rehearse lines from Shakespeare. The roar of the falls gave him courage, as nobody but himself could hear his voice. He thus fitted himself for the stage, and said later he could not have done so under other condition

cause of extreme nervousness.

He first appeared as an actor in 1847.
He was playing in Southern towns with
Wilkes Booth when the abolition party commenced to agitate. He and the who later assassinated President Lincoin owned, between them, a slave boy. Wren became an abolitionist and wanted to free the boy. Booth would not consent. They compromised by arranging that the boy should be free each second day and a slave on the alternate days. On one of his "free" days, in 1856. Wren sent him with a letter to be delivered to the agent of the "Underground Railway" at Montreal, and so obtained his freedom. He then paid Booth the amount the latter had contributed toward the purchase price

Gulf Ports May Be Beturned to Chickan ruga-The Delay Will Be Utilized to Improve the Equip-

There is no possibility that operations against Havana will begin before the expiration of at least a week, owing to he definite information that the Spanish board to await naval developments in the Caribbean Sea. There is some talk now that the invasion will be postponed until fall, and it is probable that if Admiral Sampson should by one vigorous assault destroy the prestige of the Spanish navy an invasion may not be neces sary at all.

All preparation by the troops at the Gulf ports for an immediate invasion have been suspended and orders are being dispatched to Tampa, Mobile and New Orleans directing the generals in command to await instructions before proceeding with the work already begun It is not at all improbable that on acount of hygienic conditions the regular forces now at Tampa will be ordered back to their old camp at Chickamauga. This will depend in great measure upon the maneuvers of Admiral Sampson's

The scene of Army interest will be transferred from Tampa to Chickamauga for the next few days, as a result of the abandonment of the original purpose of immediate invasion. Advantage will be taken of the delay to better the condition of the volunteers now under orders to mobilize at that camp, and they will be put through all kinds of field maneuver to improve their efficiency.

The indefinite postponement of the Cuban invasion is considered very advantageous to the quartermaster's and commis sary departments for the reasons that more time will be afforded them to purchase the necessary supplies. The Government has purchased every yard of canvas in the country for tent equipment. but this is not half enough to supply the demand, and for this reason the quartermasters general welcome the additional

time now placed at their disposal. One half of the proposed volunteer army of 125,000 men has been enlisted and mustered for service. Reports received at the Adjutant General's office by tele graph from the various recruiting stations show that up to 12 o'clock last night the total number mustered was 62,689. The number of officers was 1 M and men 90,542. Such rapid progress in the work of recruiting is shown by these reports that Army men believe the entire volunteer army will be mustered inside of a week.
